

SIDHANT DHANDE

IT System Administrator

Pune, Maharashtra, India | siddhande321@gmail.com | [linkedin.com/in/sidhantdhande](https://www.linkedin.com/in/sidhantdhande) | Contact No.- +91 8888242618

PROFESSIONAL SUMMARY

Results-driven IT System Administrator with 5+ years of progressive experience managing enterprise IT infrastructure, network security, virtualization, and cloud technologies. Proven track record in optimizing system performance, implementing robust security measures, and delivering scalable IT solutions. Expert in automation, troubleshooting, and ensuring seamless business operations across complex technical environments. Microsoft Azure and Microsoft 365 Certified with expertise in infrastructure management, cloud migration, and endpoint administration.

CORE COMPETENCIES

- System Administration & Infrastructure Management
- Network Configuration, Maintenance & Security
- Server Optimization, Monitoring & Performance Tuning
- Virtualization Technologies (VMware, Hyper-V)
- Cloud Technologies (Microsoft Azure - AZ-900 Certified)
- Endpoint Management & Microsoft 365 Administration
- IT Security, Compliance & Risk Management
- Automation & Scripting (PowerShell, Bash, Python)
- Active Directory & Group Policy Management
- Microsoft 365, SharePoint, OneDrive Administration
- Incident Response & Technical Support
- Backup & Disaster Recovery Solutions
- ITIL Framework & Service Management

PROFESSIONAL EXPERIENCE

IT System Administrator

June 2024 – Present

Blanco Technology Group, Pune, Maharashtra, India

- Manage and maintain enterprise-level IT infrastructure supporting global operations, ensuring 99.9% system uptime and reliability
- Architect and implement scalable cloud solutions leveraging Microsoft Azure services, reducing infrastructure costs by 25%
- Lead security initiatives including patch management, vulnerability assessments, and compliance audits, achieving zero critical security incidents
- Automate routine administrative tasks using PowerShell and scripting, improving operational efficiency by 40%
- Design and execute comprehensive backup and disaster recovery strategies, ensuring business continuity
- Collaborate with cross-functional teams to deliver IT projects on time and within budget
- Mentor junior administrators and provide technical guidance on best practices
- Manage endpoint devices using Microsoft Endpoint Manager and Intune, ensuring compliance and security across 500+ devices

Jr. System Administrator

March 2021 – June 2024

Blanco Technology Group, Pune, Maharashtra, India

- Administered Windows Server environments (2012 R2, 2016, 2019) and Active Directory infrastructure for 500+ users
- Configured and maintained network equipment including switches, routers, and firewalls to ensure optimal performance
- Implemented and managed Microsoft 365 environment (Exchange Online, SharePoint, OneDrive) for enhanced collaboration
- Performed system monitoring, log analysis, and proactive troubleshooting to prevent potential issues
- Executed server updates, patches, and security configurations in compliance with organizational policies
- Managed user accounts, permissions, and group policies across multiple domains
- Reduced ticket resolution time by 30% through process improvements and knowledge base development
- Deployed and maintained virtualization infrastructure using VMware vSphere and Hyper-V
- Implemented security measures including endpoint protection, firewall rules, and access controls

Technical Support Engineer

May 2020 – March 2021

Entercoms, Inc., Pune, Maharashtra, India

- Provided tier 2/3 technical support for hardware, software, and network-related issues, maintaining 95% customer satisfaction rating
- Diagnosed and resolved complex technical problems for enterprise clients, minimizing downtime
- Documented technical procedures and created user guides to improve self-service capabilities
- Collaborated with vendors and escalated critical issues to ensure timely resolution

- Assisted in system deployments, upgrades, and migrations with minimal business disruption
- Provided training to end-users on software applications and IT best practices

TECHNICAL SKILLS

Operating Systems: Windows Server (2012 R2, 2016, 2019, 2022), Linux (Ubuntu, CentOS, RHEL), Windows 10/11

Virtualization: VMware vSphere, ESXi, Hyper-V, Virtual Desktop Infrastructure (VDI)

Cloud Platforms: Microsoft Azure (IaaS, PaaS, SaaS), AWS (Basic), Office 365/Microsoft 365

Networking: TCP/IP, DNS, DHCP, VLANs, VPN, Cisco/HP Switches, Firewalls, Load Balancers

Security: Endpoint Protection, Firewall Management, Intrusion Detection, Security Compliance, Vulnerability Assessment

Endpoint Management: Microsoft Endpoint Manager, Intune, SCCM, MDM, MAM, Autopilot

Scripting: PowerShell, Bash, Python (Basic), Batch Scripting

Tools & Platforms: Active Directory, Group Policy, Exchange Server/Online, SharePoint, SCCM, Veeam Backup, Nagios/Zabbix Monitoring

Databases: Microsoft SQL Server, MySQL (Basic)

ITSM Tools: ServiceNow, JIRA, Remedy

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2014 – 2018

Babasaheb Naik Engineering College, Pusad

- Specialized in Computer Science and Engineering
- Developed strong foundation in networking, database management, and software development

Diploma in Computer Engineering

2010 – 2014

Shinde Polytechnic College, Mehkar

- Focused on Information Technology fundamentals and practical applications

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

Demonstrates foundational knowledge of cloud services and Microsoft Azure capabilities

Microsoft 365 Certified: Endpoint Administrator Associate (MD-102)

Validates expertise in deploying, configuring, securing, managing, and monitoring devices and client applications in an enterprise environment

PROJECTS

Project 1: Zero Trust Security Model

- Implemented **Zero Trust architecture** using Microsoft Entra ID, Conditional Access, and Intune
- Enforced **MFA, device compliance, and risk-based access policies** to secure identities and endpoints
- Integrated **Microsoft Defender for Endpoint** with Conditional Access for **threat-based access control**
- Configured **Identity Protection policies** (user risk & sign-in risk) to prevent account compromise

Project 2: Software Asset Management (SAM)

- Implemented **Software Asset Management (SAM)** using Freshservice and Microsoft Intune
- Automated **asset discovery and inventory tracking** using FS Agent and Intune
- Centralized asset data in **CMDB** and ensured **license compliance**
- Optimized software usage by identifying and removing **unused applications**

KEY ACHIEVEMENTS

- Successfully migrated on-premises infrastructure to Azure cloud, resulting in 25% cost reduction and improved scalability
- Implemented automated monitoring and alerting system, reducing mean time to resolution (MTTR) by 35%
- Developed and executed disaster recovery plan, achieving recovery time objective (RTO) of less than 4 hours
- Led security hardening initiatives that resulted in 100% compliance with industry security standards
- Recognized for exceptional problem-solving skills and dedication to maintaining high system availability
- Successfully deployed Microsoft Endpoint Manager across the organization, improving device management efficiency by 45%
- Streamlined patch management process, achieving 98% compliance rate across all managed endpoints
